

Grave Situation for Athletics

Leipsic Free Press – September 3, 1942

County Superintendent, Carl D. Vermilya, has mailed instructions to the different superintendents that school busses must not be used to transport athletic teams or spectators during the upcoming season. This ruling was decreed from the state department of education.

He said that it will depend upon whether schools feel that they can obtain enough private cars to transport teams if they are to continue interscholastic contests or abandon them for the duration. It is understood that several of the schools still are planning to play basketball unless restrictions are increased.
